Certificates

RAL-certified – of course!

Our window and door frame profiles are RAL certified and are subject to regular quality monitoring.

RAL Quality Marks identify those products and services that are manufactured or provided according to high, precisely specified quality criteria and monitored on a regular basis by independent test institutes (SKZ, Süddeutsches Kunststoff-Zentrum and IFT, Institut für Fenstertechnik). By this means, a permanent serviceability of our windows and doors can be guaranteed to make sure that you will enjoy them for many years to come.

CE marking – for sure!

The CE marking is a quality mark issued by the European Committee for Standardization "CEN". The CE standard determines product properties and performance classes for windows and doors of all materials for the European market. It states the product's conformity with the applicable European standards and guidelines, removes trade barriers and thus simplifies pan-European trade.

aluplast windows and doors meet the CE requirements and are monitored on a regular basis by the test institute IFT.

Recycling and environmental protection

Our great advantage: PVC can be recycled and reused!

Protecting the environment and conserving resources is of utmost importance and indispensable these days.

aluplast is part of Rewindo GmbH, whose aim is to achieve sustainable and responsible economic activity by maximizing the recycling quote.
